Test Case Number	Details
1	Using all X and Y features, showing CP table before pruning and image of pruned tree based on minimum xerror
2	Using all X features, showing CP table before pruning and image of pruned tree based on minimum xerror
3	Using all Y features, showing CP table before pruning and image of pruned tree based on minimum xerror
4	Using all X and Y features for Group =0 only, showing CP table before pruning and image of pruned tree based on minimum xerror
5	Using all X for Group =0 only, showing CP table before pruning and image of pruned tree based on minimum xerror
6	Using all Y features for Group =0 only, showing CP table before pruning and image of pruned tree based on minimum xerror
7	Using all X and Y features for Group =1 only, showing CP table before pruning and image of pruned tree based on minimum xerror
8	Using all X for Group =1 only, showing CP table before pruning and image of pruned tree based on minimum xerror
9	Using all Y features for Group =1 only, showing CP table before pruning and image of pruned tree based on minimum xerror

Test case 1:

```

      CP nsplit rel error    xerror    xstd
1 0.27172457    0 1.0000000 1.0024941 0.00489957
2 0.03512004    1 0.7282754 0.7449331 0.05109997
3 0.03110859    2 0.6931554 0.7566858 0.05373062
4 0.01370313    3 0.6620468 0.7260592 0.05079050
5 0.01000000    4 0.6483437 0.7334457 0.05181024

```

 Course: Data Analytics
 Student Number: 19308502

Test Case 5:

	CP	nsplit	rel error	xerror	xstd
1	0.19861956	0	1.0000000	1.029352	0.01912351
2	0.05236582	1	0.8013804	1.050119	0.08734673
3	0.01000000	2	0.7490146	1.050119	0.08734673

Test Case 6:

	CP	nsplit	rel error	xerror	xstd
1	0.0837823	0	1.0000000	1.011700	0.01794214
2	0.0100000	1	0.9162177	1.019217	0.06262912

Name: Shikher Singh
 Course: Data Analytics
 Student Number: 19308502

Test Case 7:

	CP	nsplit	rel error	xerror	xstd
1	0.30778614	0	1.0000000	1.0060073	0.003798592
2	0.04139071	1	0.6922139	0.8016858	0.070934616
3	0.03354564	2	0.6508232	0.7577154	0.066183955
4	0.01000000	3	0.6172775	0.7141852	0.066891270

Name: Shikher Singh
 Course: Data Analytics
 Student Number: 19308502

Test Case 8:

	CP	nsplit	rel error	xerror	xstd
1	0.30778614	0	1.0000000	1.0060073	0.003797688
2	0.04139071	1	0.6922139	0.7516009	0.068110931
3	0.03354564	2	0.6508232	0.7405316	0.066428419
4	0.01000000	3	0.6172775	0.7049076	0.066534113

Test Case 9:

	CP	nsplit	rel error	xerror	xstd
1	0.27020028	0	1.0000000	1.0111699	0.004410272
2	0.02824659	1	0.7297997	0.7795858	0.065883325
3	0.01000000	2	0.7015531	0.7783194	0.065585703

Name: Shikher Singh
Course: Data Analytics
Student Number: 19308502

Conclusion: Rel Error got reduced when we only train Model for Group 1 only with either X & Y together or X alone.
